

POWERING THE PINNACLE OF LUXURY MOTORCOACHING

Millennium Luxury Coaches Integrates Advanced RTI Control and Automation into their Premier Model

In the world of luxury motorcoaching, where a singular vision of uncompromising quality and innovation reigns supreme, Millennium Luxury Coaches has established itself as an industry leader. For their 2025 H3-45 Premier model, the company sought to elevate the customer experience to new heights by seamlessly integrating the latest control and automation technologies.

"We don't just have an engineering department, we have a company of engineers, all empowered to design, create and constantly improve our product," said Millennium's Customer Care Manager, Willie Dillingham. "Our fresh approach to design and innovation shines through in every Millennium Luxury Coach."

Central to the 2025 H3-45's luxury experience is the RTI control and automation platform. Millennium's engineers leveraged the intuitive RTI programming tools and hardware to put the coach's owners firmly yet easily in command of a vast array of features and amenities.

"RTI is controlling the TV, lighting, shades, awnings, water tanks, and more," explained System Integration Manager Corey McIntire. "We tell our customers that this system is the true 'brains' of the coach."

From the coach's expansive quad slide layout to the custom-fabricated countertops and heated floors, RTI's seamless integration ensures that every element of the luxurious living space can be effortlessly managed. Millennium also incorporated comprehensive Lutron lighting and shade automation, further expanding the coach's smart capabilities.

But the integration goes beyond mere convenience. Millennium used RTI control solutions to enhance the coach's safety and security features as well. For example, a 360-degree birds-eye camera system provides the driver with enhanced visibility, while the RTI-powered access control system logs all entries and exits for added peace of mind.

POWERING THE PINNACLE OF LUXURY MOTORCOACHING

Millennium Luxury Coaches Integrates Advanced RTI Control and Automation into their Premier Model

"Power, beauty, function, and precision - that's the Millennium way. And RTI's control and automation solutions are an integral part of delivering that promise to our customers."

Jim Brennan

Customer Care Manager, Millennium Luxury Coaches

"Power, beauty, function, and precision - that's the Millennium way," Customer Care Manager Jim Brennan proudly declared. "And RTI's control and automation solutions are an integral part of delivering that promise to our customers."

Indeed, the 2025 H3-45's cutting-edge technology is just one facet of a holistic design philosophy that prioritizes the customer experience above all else. From the custom exterior

paint to the meticulously crafted interiors, every detail has been meticulously engineered to exceed the expectations of the most selective motorcoach enthusiasts.

"We don't just sell coaches," the Millennium team emphasized. "We sell passion. We sell pride. And we won't stop until our customers are satisfied."

With the integration of forward-thinking RTI control systems, Millennium Luxury Coaches has once again raised the bar for luxury motorcoaching, delivering a truly remarkable experience that seamlessly blends innovative technology with unparalleled craftsmanship.
